Three ways to add and use camera

① → **IP mode setting for new device**

⬇

② → **Add an Online device (IP Mode)**

⬇

**③** → **AP mode setting for new device**

***AP mode for point to point , the camera can not be view remotely . the phone need to be close to the camera to be able to view the live videos. **
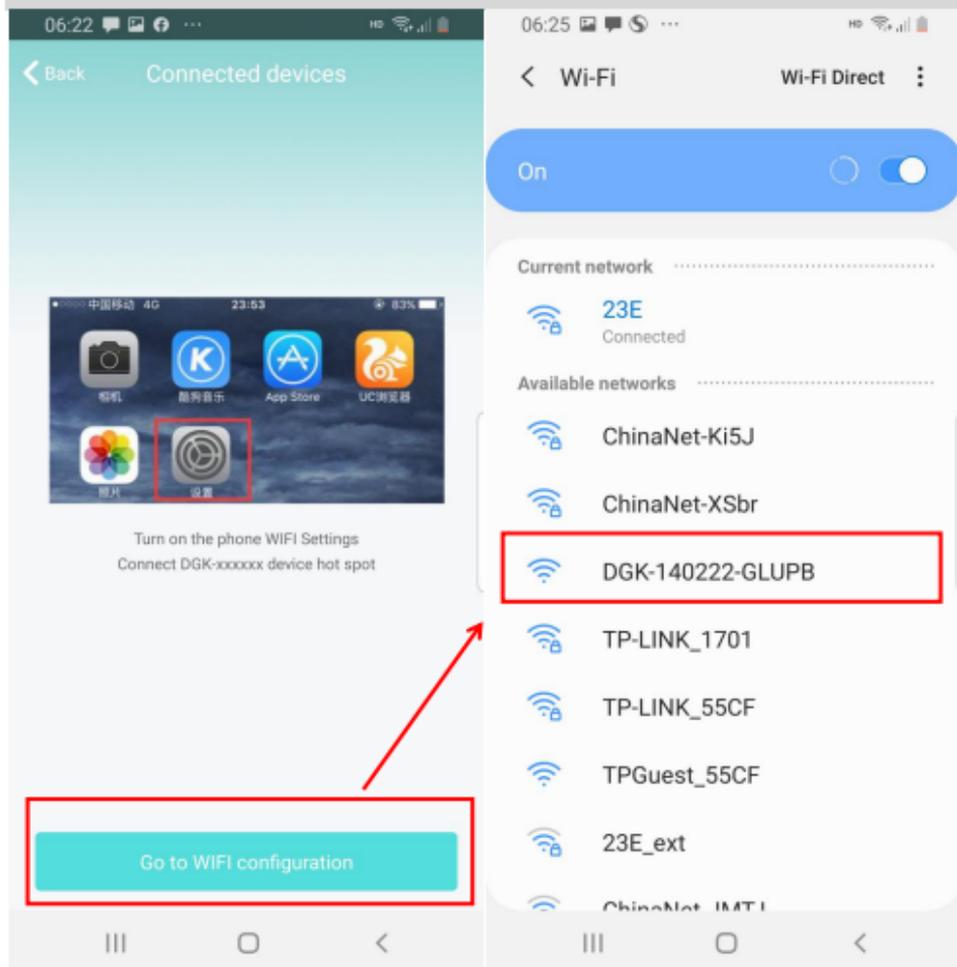

Way ① IP Mode Setting

***Camera configured**

Before setting, connecting the device with power supply and turn it on.

Open the "HDWIFICam Pro" App , Click + to add a new device ,when using the camera for the first time please select the first way .
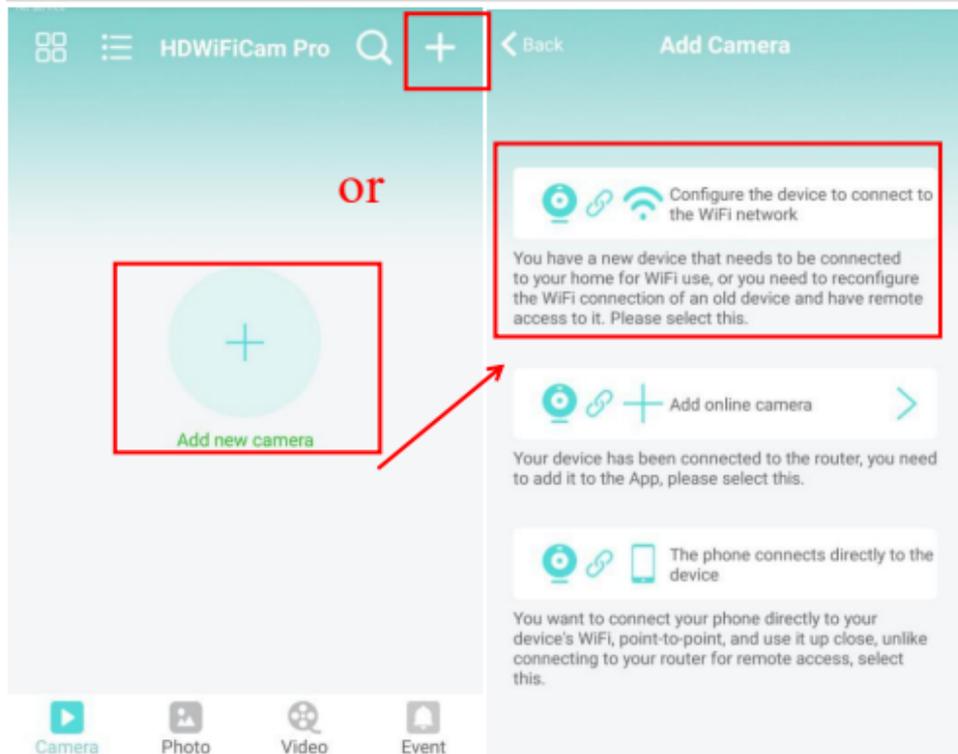

Go to " Setting" on your device . Tap on "Wi-Fi" and connect the network same as camera's UID （which is unique to each unit)

Turn on the phone WIFI Settings
Connect DGK-xxxxxx device hot spot

Go to WIFI configuration

***If there is no hotspot WIFI please reset the camera and wait the camera reboot**

🛜 Android system ⌃

Internet may not be available

Connect to another network or turn on Switch to mobile data.

Switch to mobile data   **Another network**

If your Android system phone show you that "the current WLAN network cannot access the internet , Switch to another network ?" Just ignore it.

After connecting with the UID , you need select your home's 2.4Ghz WI-FI signal and enter the correct password . Confirm the password and connect. Then click "done".
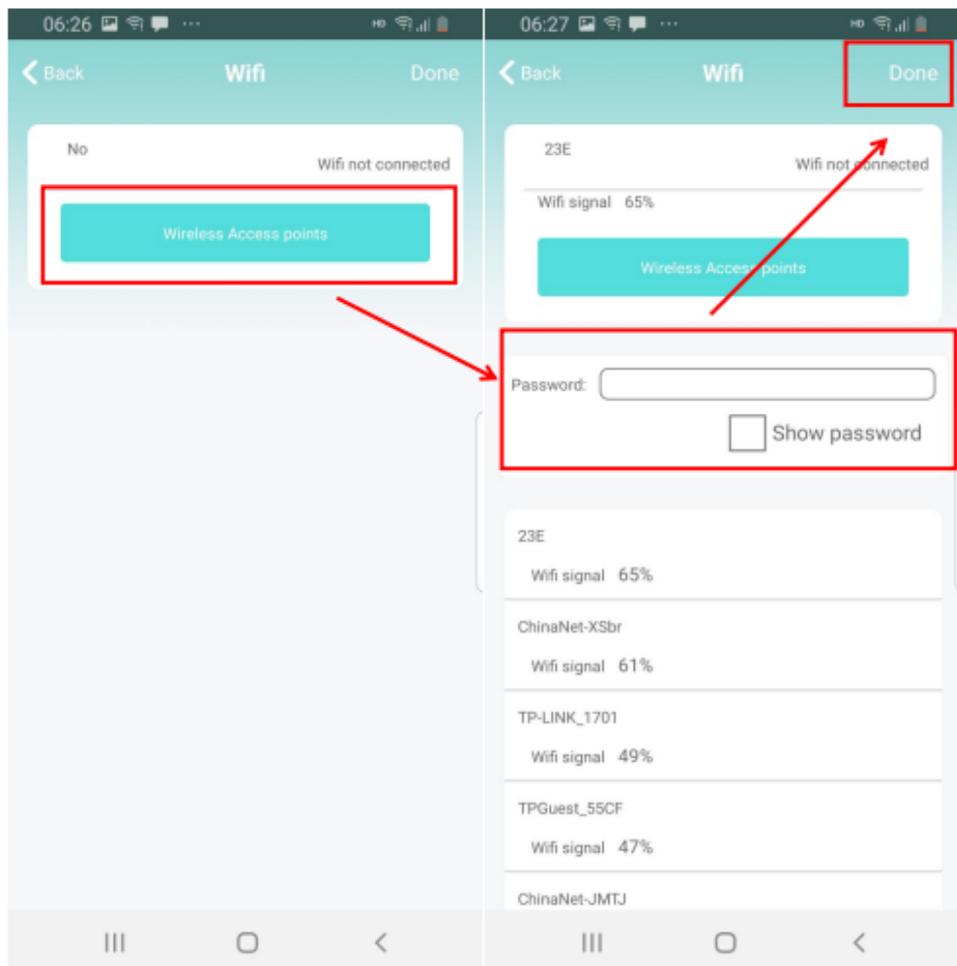

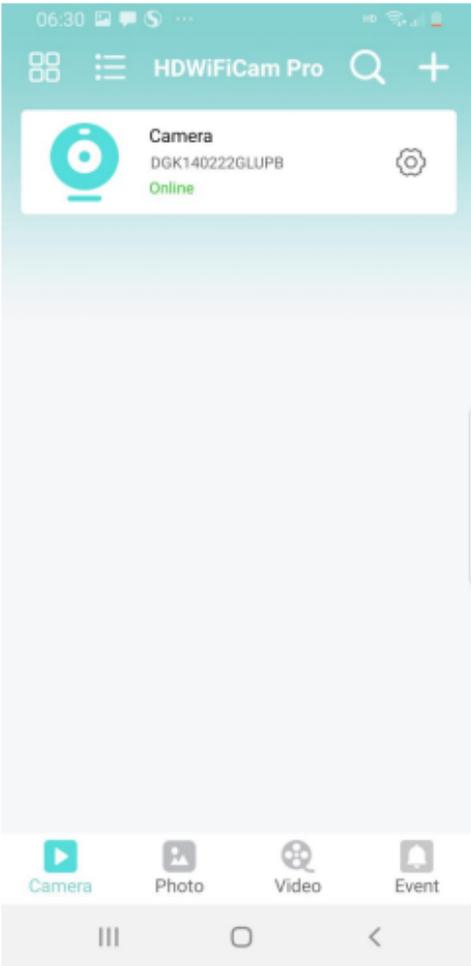

The camera will reboot. It takes about 2-5 minutes, then the camera will show online.
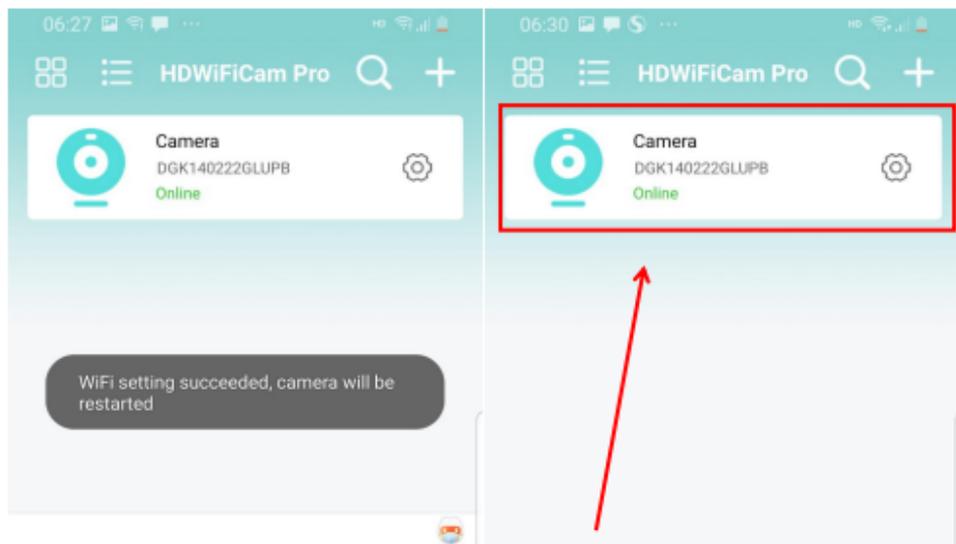

If the camera show "disconnected ", click UID number to refresh the state .

***If the camera show "connection timeout", That means Wi-Fi password is wrong . Please reset the camera ,and connect again.**

Way ③ AP mode setting

***Camera configured**

Before setting, connecting the device with power supply and turn it on.

Open the "HDWIFICam Pro" App , Click + to add a new camera .

or

Add new camera

Configure the device to connect to the WiFi network

You have a new device that needs to be connected to your home for WiFi use, or you need to reconfigure the WiFi connection of an old device and have remote access to it. Please select this.

Add online camera

Your device has been connected to the router, you need to add it to the App, please select this.

The phone connects directly to the device

You want to connect your phone directly to your device's WiFi, point-to-point, and use it up close, unlike connecting to your router for remote access, select this.
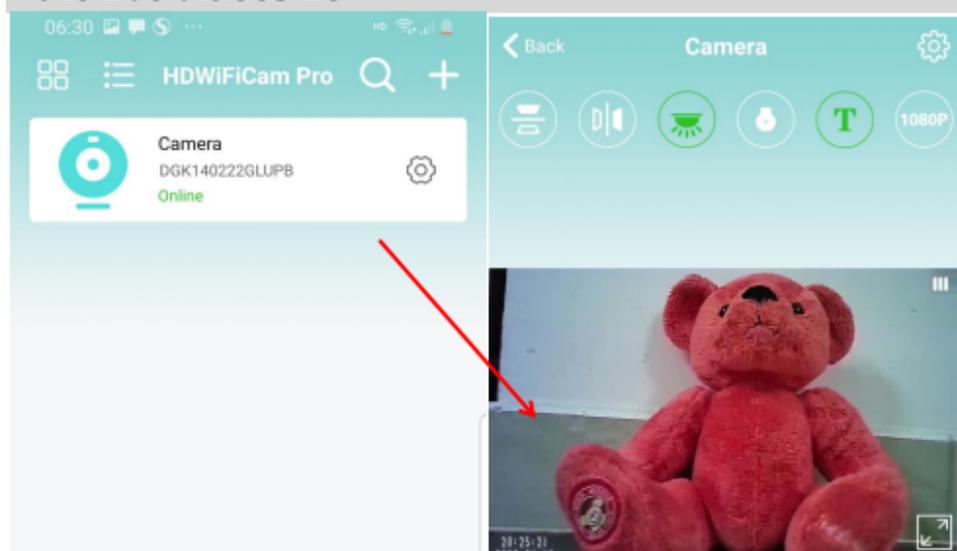

Go to " Setting" on your device . Tap on "Wi-Fi" and connect the network same as camera's UID （which is unique to each unit)

***If there is no hotspot WIFI please reset the camera and wait the camera reboot**

After connecting the device's hotspot Wi-Fi, it will be added automatically. And you could view the live videos now.

If the camera show "disconnected ", click UID number to refresh the state.

  ***AP mode for point to point, the camera can not be view remotely. the phone need to be close to the camera (less than 10 meters) to be able to view the live videos**
